

Figure 1: Residualised reading time at the different sentence locations in Experiment One. “[TITLE]” indicates the location of the critical items.

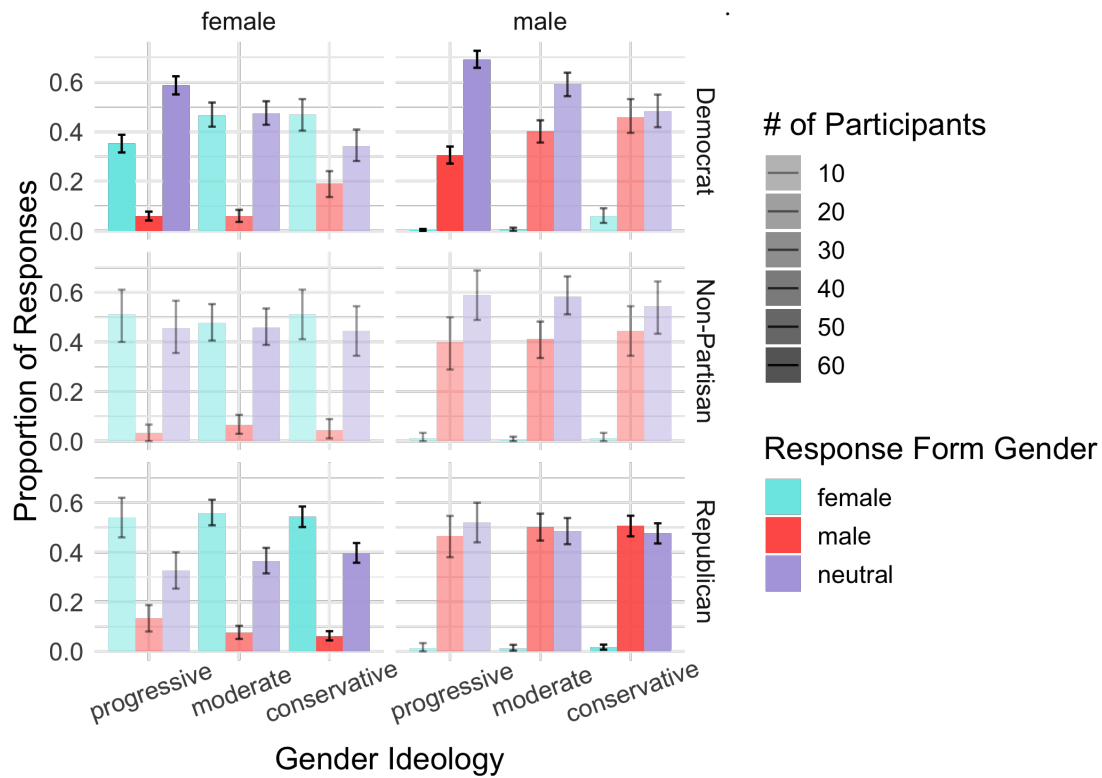

Figure 2: Proportion of responses by gender produced in Experiment Two, according to gender of the name in the stimulus sentence (x-axis facet) and participant political alignment (y-axis facet)

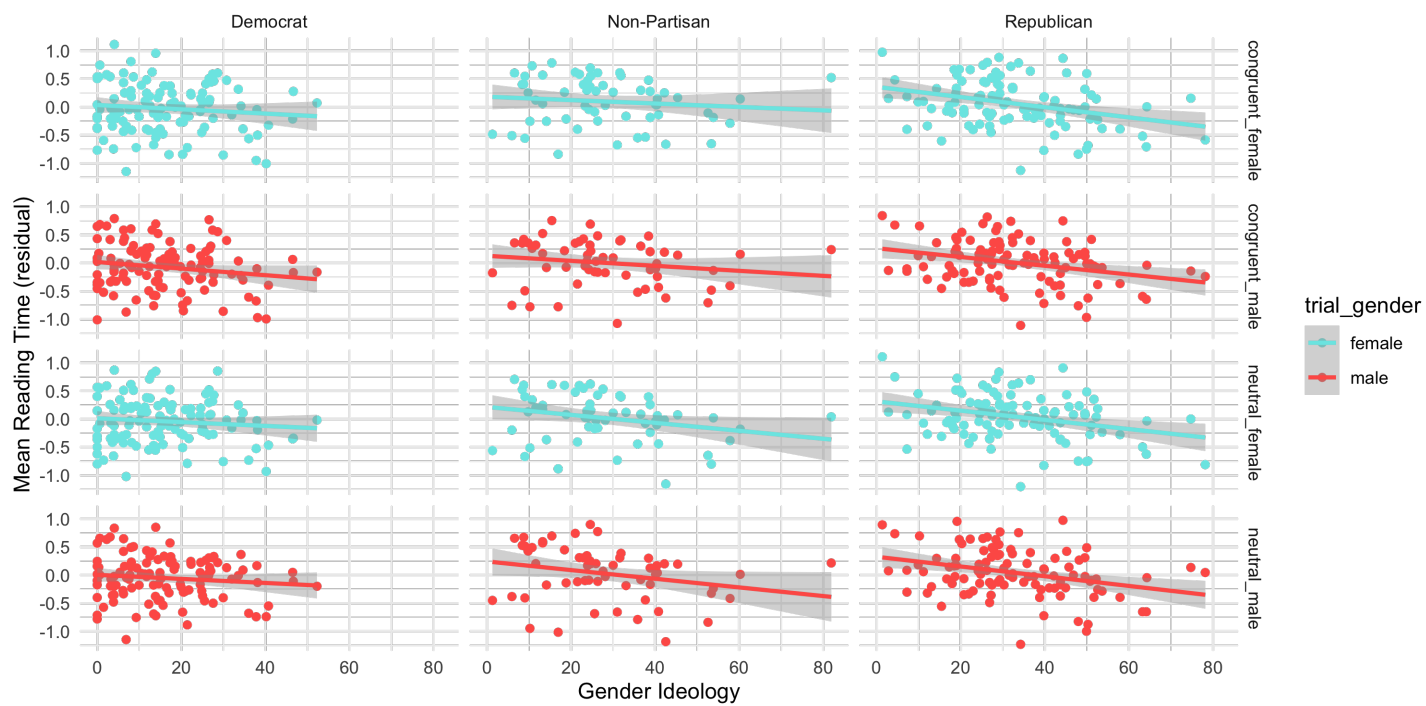

Figure 3: null

Table 1: Model outputs for each fixed effect (rows) for each of the political macrocategories. Significant cells are shaded.

	Democrats			Non-Partisans			Republicans
